Web Page Design

Have your web site designed and maintained by professionals

Amazing Art and Graphics creates custom web sites to your specifications, at an affordable price. From consultation, through concept, to design and publishing, we work hard to create the web image you are looking for. Then, we offer maintenance and updating to keep your site up to date with your changing needs.

Consultation

If you have questions about how a web site could help your business or organization, contact us for a FREE consultation.

Concept

If you are not sure how you want your web site to look or if you don't know how to make it look the way you want it to look, our designers can help you. If we design your site, all concept time is FREE.

Design

Our designers can take your concept and turn it into a real, professional web site.

Publishing

We can publish your site to your own domain or to a shared domain. If you don't have a domain, we can help you get one.

Maintenance

Once your web site is set up the way you want it, Amazing Art and Graphics can maintain that site for you for a minimal monthly fee. Some updating is included such as monthly menus at restaurants or monthly viewing lists at theatres or minor changes to the page or site.

Updating

If you want to make major changes to a published site, we can do this for a minimal fee. An example of updating would be a photographer replacing all the photos on the page with new ones or a company changing its image and needing the site to reflect the new image or an organization changing the format of their site.

Web Domain Set-up

If you want your own web domain and do not already have one, we can set that up for you.

Graphic Design

From logos to fine graphic art, Amazing Art and Graphics does it all!

Our artists create Amazing Images from design to completion.

Logo Design

We can help you create the right symbol for your company or organization. Be recognizable, be unforgettable, be amazing.

Graphic Design

Looking for an illustration of a product or concept, we can start with your idea or your photos and create the right design for you.

Photo Editing

- Would you rather take pictures than edit them?
- Are you a professional photographer with several photo orders to edit and not enough time to do it?
- Do you have old photos that you would like to restore?
- Do you have family members missing from family photos?
- Would you like a picture with all of your pets together?
- Would you like to take something (or somebody) out of a photo?
- Would you like your recent wedding picture to look like an antique?
- Would you like to colorize black and white photos?

Let us edit your photos for you. We can do amazing things with photos.

From Photos

We can scan your photos, edit them, and return the originals to you with your order.

From Emailed Images

We can use your digital camera images or your own scanned images for editing. Just email them to us with instructions about what you want changed, added, removed, etc.

From photo CD's

We can use your photo CDs to retrieve the photos you want edited. If it is easier to mail us a CD than to send us images via email, feel free to do so. We will return your original CD to you with your order.

From Raw Camera Files

Professional Photographers, we can use your camera's own raw files for editing.
